

JEEVAN DEVANG

Artificial Intelligence & Machine Learning Student | Software & AI/ML Enthusiast

India | Phone: [Add Number] | Email: [Add Email] | LinkedIn: [Add Link] | GitHub: [Add Link]

PROFILE

Artificial Intelligence and Machine Learning student with hands-on experience building full-stack applications, AI-powered systems, Android applications, and automation workflows. Strong foundation in data structures and algorithms, backend development, databases, and modern AI tooling. Seeking software engineering, AI/ML, or backend internship opportunities where I can build practical products and grow through real-world engineering.

EDUCATION

Bachelor of Engineering — Artificial Intelligence & Machine Learning | [College Name], Karnataka

Expected Graduation: [Year] | Current: 2nd Year / 3rd Semester

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, TypeScript, SQL

AI / ML: Machine Learning, Data Analysis, Scikit-learn, Pandas, NumPy, PCA, K-Means, Regression, SMOTE

Backend: FastAPI, Flask, Node.js, Express.js, REST APIs, JWT Authentication

Frontend: React, Vite, TypeScript, HTML, CSS

Databases: MySQL, PostgreSQL, Supabase, Firebase

Tools: Git, GitHub, VS Code, Android Studio, Postman, Power BI, UiPath

AI Engineering: LangGraph, LangChain, Ollama, LLM-based application development

PROJECTS

AI Resume + Job Matching Platform

Designed an AI-driven platform concept that parses resumes, extracts skills, compares candidate profiles with job descriptions, calculates match scores, and explains missing skills using a React, FastAPI, PostgreSQL/Supabase, and AI/ML architecture.

Constraint-First Wellness Agent

Built a non-medical lifestyle planning system using React + TypeScript, FastAPI, LangGraph agent orchestration, and Ollama-based local LLM integration, with emphasis on deterministic planning and constraint-aware recommendations.

JM Motors — Car Showroom Management System

Developed a full-stack showroom management application with React, Flask, MySQL, JWT authentication, manager/employee roles, inventory management, customer and supplier records, and sales APIs.

WanderPlan — Travel Planner Android App

Developed a Java Android application with Firebase Authentication, Google Maps integration, trip creation, itinerary planning, saved places, route planning, and local trip storage.

Library Management Automation

Designed a UiPath RPA workflow for adding and searching books, issuing and returning books, tracking overdue items, and generating fine notifications using Excel/CSV data.

CORE COMPETENCIES

Data Structures & Algorithms | Object-Oriented Programming | REST API Development | Database Design | Authentication & Authorization | Problem Solving | AI/ML Fundamentals | Software Development

PROBLEM SOLVING

Regular practice in binary search, sorting, arrays, divide and conquer, greedy algorithms, dynamic programming, graphs, recursion, backtracking, and related algorithmic problem-solving patterns.

INTERESTS

AI Engineering | Software Development | Data Science | Product Building | Technology
